

Overview of Web Applications

About me

I am Terence

Our Objective

To understand how a
web application works
basically, and **MORE**

Table of Contents

- **Technical Overview**
- **Software Engineering Overview**
- **Orbital Requirements**
- **Advice**

Look out for the colored bars on top!

Straightforward, direct

Need some time to understand

Needs prior knowledge to understand

1. Technical Overview

Basics of Web Programming

This is all you need, basically

HTML

HyperText Markup Language

*It's the **Structure** of all Web Pages*

*It also describes the **Content** of all Web Pages*

HTML

HTML Elements

There are many elements!

- ``
- `<h1>`, `<h2>`, `<h3>`
- `<div>`
- `<button>`

And many more!

HTML

A simple example

```
<!DOCTYPE html>
<html>
<head>
<title>Page Title</title>
</head>
<body>

<h1>My First Heading</h1>
<p>My first paragraph.</p>

</body>
</html>
```

My First Heading

My first paragraph.

CSS

Cascading Style Sheet

It controls the layout of multiple web pages at once

*It also describes how HTML elements are to be **displayed on screen***

CSS

CSS Declarations

There are many types!

- color
- width
- font-size
- text-align

And many more!

CSS

A Simple Example

```
<!DOCTYPE html>
<html>
<head>
<style>
h1 {
  color: red;
  text-align: center;
}
</style>
</head>
<body>

<h1>My First Heading is styled with CSS</h1>
<p>My First Paragraph</p>

</body>
</html>
```

My First Heading is styled with CSS

My First Paragraph

CSS

:hover, :focus

**p:hover
.class:hover**

**input:focus
.class:focus**

JavaScript

*It's the **Logic** of all Web Pages*

It also programs the behaviour of web pages

Different Tools

There are many tools!

- `getDate()`
- `getElementById()`

And many more!

Go for the HTML/CSS Class later! **(at 4 pm)**

More information will be shared!

Web application demonstration

<http://isteps.comp.nus.edu.sg/settings/userInfo>

<https://developer.mozilla.org/en-US/docs/Web/API/XMLHttpRequest>

<https://developer.mozilla.org/en-US/docs/Web/HTTP/Status>

What is shown to a web app user?

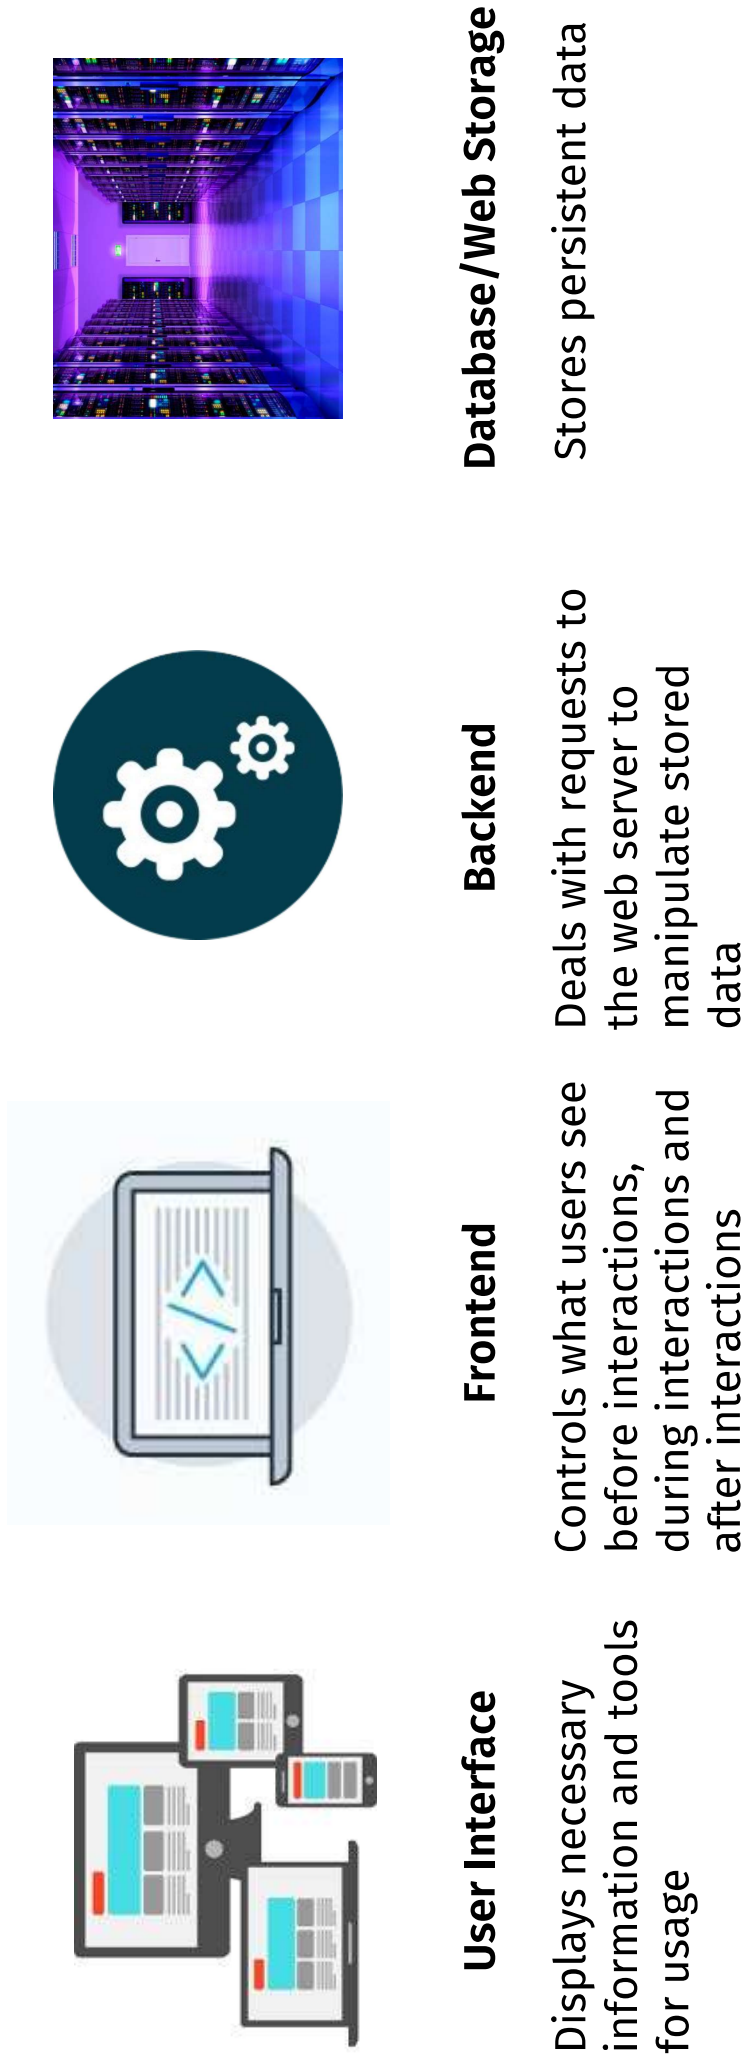

- HTML + CSS
- UI feedbacks when an action is completed

- Underlying Javascript logic
- Requests to the server/Requests from the server

So, how are web apps structured?

Full Stack Explained

User Interface

Placement of Elements with HTML

Aesthetics controlled by CSS

Frontend

Client-sided logic that performs user feedback

Commonly in Javascript

Backend

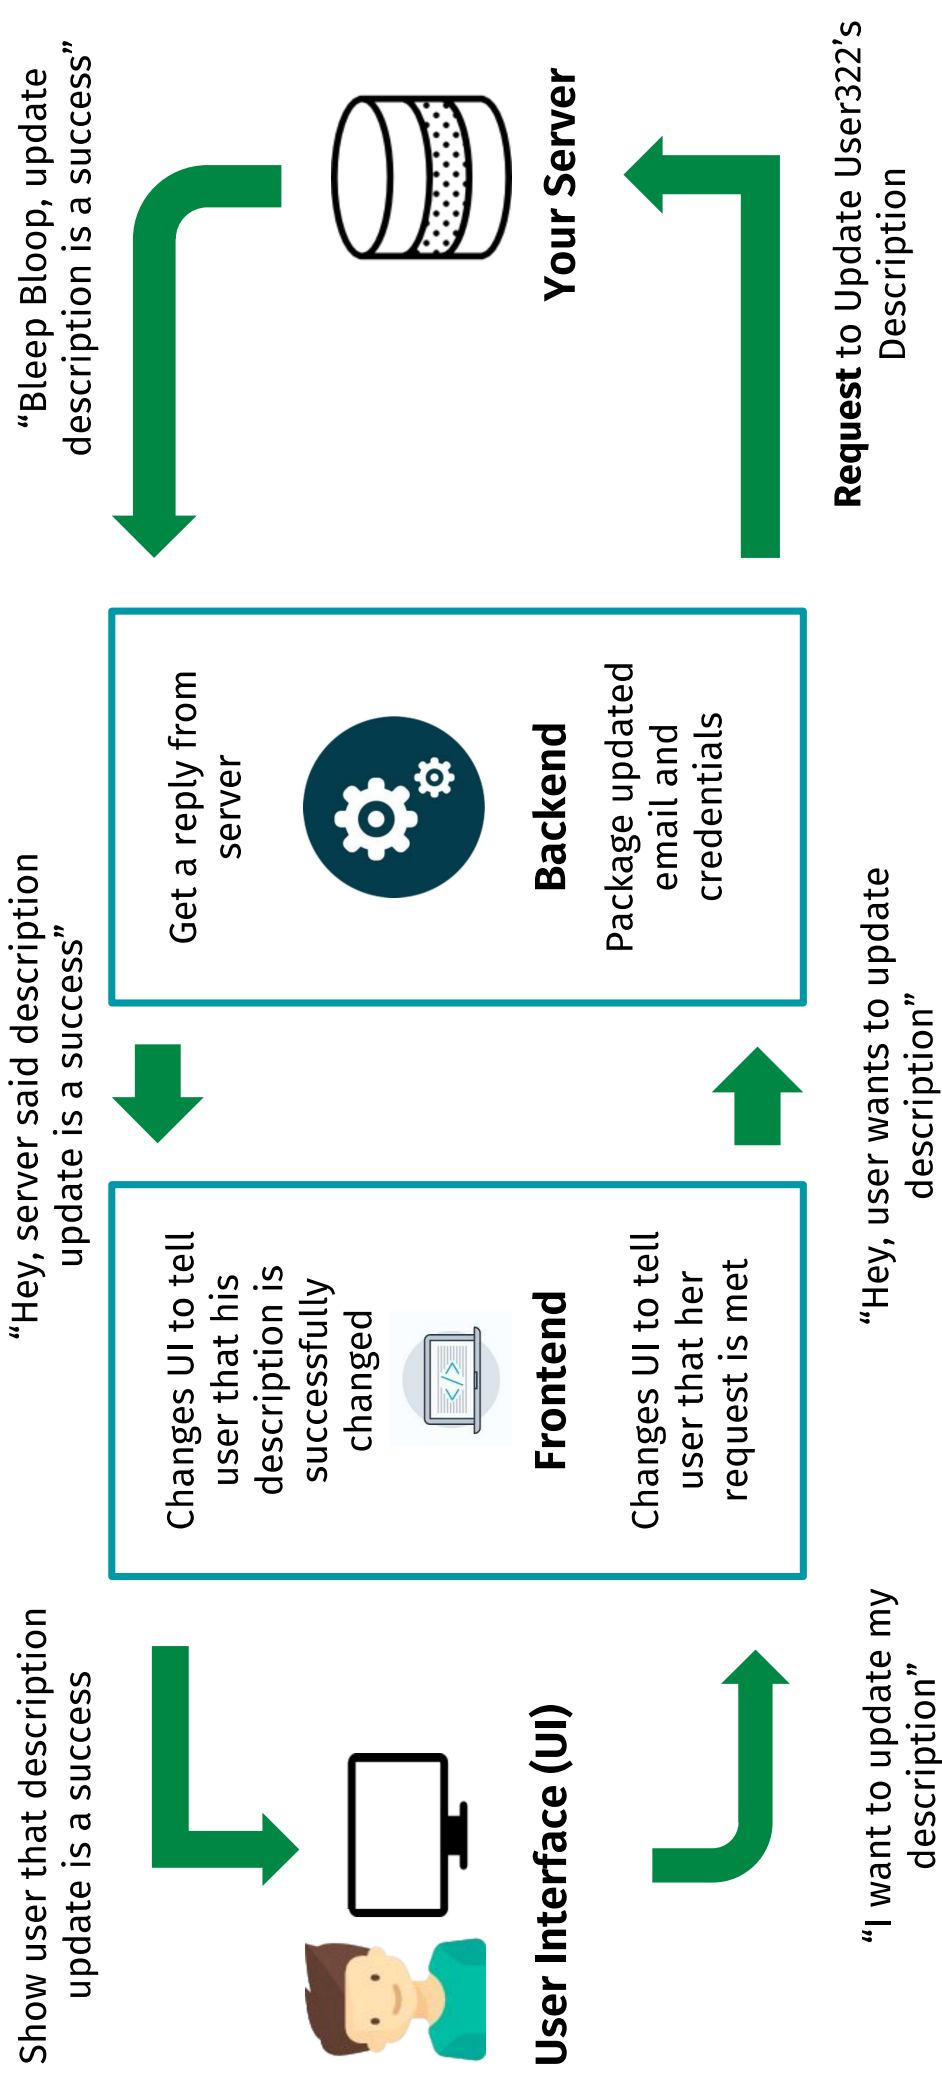

Server-sided logic that manipulates stored data in storage

Database/Web Storage

Captures data

Allows queries, updates and creations.

Process flow of a web application

Popular Frameworks!

User Interface

Frontend

Backend

django

Database/Web Storage

<https://atlassian.design/>

How to choose the right Frontend/Backend framework?

How to choose the right Frontend/Backend framework?

- Pick the one that is popular - React, Express
- Pick the one you are comfortable with
- Pick the one you have prior knowledge - not recommended

<https://medium.com/@ZombieCodeKill/choosing-a-javascript-framework-535745d0ab90>

How to choose the Right Database?

Relational vs Non-relational

Employees Table

| IdNum | LName | FName | JobCode | Salary | Phone |
|-------|------------|---------|---------|--------|--------------|
| 1876 | CHIN | JACK | TA1 | 42400 | 212/588-5634 |
| 1114 | GREENWALD | JANICE | ME3 | 38000 | 212/588-1092 |
| 1556 | PENNINGTON | MICHAEL | ME1 | 29860 | 718/383-5681 |
| 1354 | PARKER | MARY | FA3 | 65800 | 914/455-2337 |
| 1130 | WOOD | DEBORAH | PT2 | 36514 | 212/587-0013 |

- Good for user profiles, forms etc
- **ACID** - intended to guarantee validity even in the event of errors, power failures, etc - <https://en.wikipedia.org/wiki/ACID>

```
{  
  idNum: 1556,  
  LName: "PENNINGTON",  
  FName: "MICHAEL",  
  JobCode: ""  
}
```

- Good for unstructured or semi-structured data like videos, text, audio etc
- Allows flexibility

2. SE Overview

You'll need these too

Collaborative Software Development

Software Version
Control

Allow you and your
partner to work in
real-time!

Ticketing system

Plan and assign tasks

Team communication
tool

Integrations with
GitHub, Trello, Google
Drive and more

Big Bang Development

Iterative Software Development

Not like this....

Like this!

Working with a partner

1. *One person in charge of UI + Frontend, the other in charge of Backend + Database. Communicate and integrate often.*
2. *Modularize your development - one person does login feature, covering front to back. The other does profile feature, covering front to back. Communicate and integrate very often.*
3. *Everyone does everything. ***At your own risk****

3. Orbital Requirements

What is needed

Requirements for **Vostok**

- *Basic level web app*
- *Your web application must contain CRUD*
- *Must be minimally viable - features are working, decent aesthetics*
- *Give better than average feedback for your peers!*

Requirements for Gemini

- *A Web application with suitable extensions. ie. Google Maps API, Facebook Graph APIs.*
- *Use web application frameworks*
- *More than just a minimal viable product, very good aesthetics, great features*
- *Give good feedback to your peers!*

Requirements for Apollo 11

- [NUSMods-Quality](#)
- *Good software engineering practices*
- *Usability testing*
- *Give comprehensive and beneficial feedback to peers!*

Remember this?

4. Advice

You need this too

Constant Communication

- *Your partner is your best friend this summer*
- *You need to talk to your Orbital mentor/advisor/tutor/profs constantly - I only went through 0.1 % of web application development, ask questions!*
- *Use Slack extensively - ask anything, reply to questions you can answer*

Be Resourceful

- *Google anything you don't know - **StackOverflow** is your programming best friend*
- *Find online courses/resource repositories online*
- *(Optional) Purchase courses online to accelerate learning*

Time for Questions!
